

# CYBER\$ENTIAL

THE ESSENTIAL CYBER COVERAGE

Community Associations, Apartment Complexes and Property Managers face an ever increasing threat in the event of a cyber or data breach resulting in the theft of the personally identifiable information stored in their records.

## The Threat from the Net

- ▶ Over 170 million Americans live in community associations and apartments
- ▶ Identity Theft is America's fastest growing crime.
- ▶ Victims of cyber attacks incurred roughly \$5 billion in damages last year..

In response to this increasing exposure, **Cyber\$ential** has been specifically designed to protect your community association, apartment and property management clients from the financial consequences of a cyber/privacy breach resulting in financial liability.

A choice of four options offer limits from \$100,000 to \$1,000,000 at the industry's most competitive rates for qualifying risks. Broad coverage features extend coverage to many situations that are commonly overlooked.
